## Jace Galloway

---

I am looking to build a career in Full Stack React Web Development. My skills for this field are listed in detail at the bottom of my resume. I have recently graduated from The Ohio State University Full Stack React Bootcamp in order to switch careers. Over the years, I have gained diverse experience in various roles that can be leveraged in this endeavor and give me a unique approach that adds immense cross-disciplinary value.

I started as a Quality Assurance Analyst, ensuring the quality of the MLB The Show video game franchise. I then moved into a Marketing role, where I honed my skills in marketing strategies and implementation. My experience as a Driver and an Insurance Broker has enhanced my communication and problem-solving skills. I am now eager to leverage my comprehensive skill set in a Full Stack React Web Development role.
